PROFILE

Hardworking and self-driven IT student pursuing a Bachelor of Computing at Belgium Campus ITversity, with a strong interest in web development, problem-solving, and artificial intelligence. Runs TK Digital Studio, building responsive, multi-page websites for local businesses across various industries. Combines a technical mindset with a creative eye for design, developed through digital art and illustration. Quick to learn new technologies and genuinely enjoys fixing and building things.

SKILLS

- **Web development:** HTML, CSS, JavaScript, responsive multi-page website design
- **Backend & databases:** Java, C#, PostgreSQL, JDBC, Node.js, Express, MongoDB, EJS
- **Front-end enhancements:** Three.js effects, PWA setup, SEO/structured data (JSON-LD), dark mode
- **Tools:** IntelliJ IDEA, Visual Studio, Git, xUnit — plus daily use of AI tools (Claude, Gemini) for development and research
- **Soft skills:** problem-solving, self-directed learning, attention to detail, teamwork, clear communication

EXPERIENCE & PROJECTS

Config & Scenario Setup Module — ABM.NET Framework — 2026 – Present

Final-year group project, PRJ381, Belgium Campus ITversity — team of 7

- Built the configuration module for a distributed Agent-Based Modelling framework in C#/.NET 8, parsing JSON/YAML scenario files into a validated SimulationConfig object consumed by the simulation engine
- Implemented validation logic that surfaces every configuration error in one pass rather than failing on the first, plus a CLI demo app and an xUnit test suite
- Defined the config module's public interface and hand-off contract so teammates building the agent logic, simulation engine, and persistence layers could integrate against it independently

Freelance Web Developer — TK Digital Studio — 2025 – Present

Independent web design practice, Gauteng, South Africa

- Independently designed and built responsive, multi-page demo websites for real businesses across medical, hospitality, construction, and beauty industries, including Dr Andie Family Practice, Mpudulle Eye Centre, Julia Mathabathe (Clinical Psychologist), Wonderboom Car Service, and Filadelfia Secondary LSEN School
- Implemented advanced features such as real-time open/closed indicators, WhatsApp integration, JSON-LD structured data for SEO, dark mode, and Three.js 3D visual effects
- Practiced end-to-end web design workflow, from concept and layout to development and client-style presentation
- Digitized physical business information into clean, structured digital formats as part of website builds
- Built each project speculatively to strengthen practical development skills and grow a personal portfolio

University Cleaning Inventory & Issuance System — Java Swing Application — 2026

Group project, Programming 381 (Track B), Belgium Campus ITversity — team of 2

- Built core application logic and the PostgreSQL/JDBC data layer as part of a two-person development team
- Set up and configured the IntelliJ IDEA project environment for the team
- Produced technical documentation and a narration script for the project's video presentation

EventHub — Event Management Platform — 2026

Group project, WPR381, Belgium Campus ITversity

- Delivered the front-end using Node.js, Express, MongoDB, and EJS as part of a team project

- Identified and resolved integration bugs in a teammate's backend code
- Prepared the full project presentation and coordinated peer communication

EDUCATION

Bachelor of Computing (Software Engineering) — 3rd Year, In progress
Belgium Campus ITversity

National Senior Certificate (Matric) — 2022
Charlton Vos College of Education

LANGUAGES

Setswana (Home Language) • English (Fluent) • Afrikaans (Basic) • Zulu (Basic)

INTERESTS

Digital art & illustration • Website & product design • Artificial intelligence • Console hardware tinkering • Gaming (strategy & multiplayer) • Soccer • Music
